

Dr. Silvia Stringhini is Senior Lecturer at the Institute of Social and Preventive Medicine in Lausanne, Switzerland. She holds a PhD in Epidemiology and Public Health, a Masters in Global Health and a Master in International Economics. Her main research areas are: social inequalities in chronic diseases and ageing, the role of health behaviours in the genesis of social inequalities in health, and the biological consequences of social inequalities. She has been working on data from several cohorts from different countries, including the UK, France and Switzerland. She is the principal investigator of several research grants from the Swiss National Science Foundation

and she is a co-investigator and work package leader of the EU Horizon 2020 LIFEPAH project.
